The **ModPod** manufactured by Applied Wireless Solutions is a Weatherproof Steel Environmental Enclosure ideal for multiple security cameras and wireless Wi-Fi systems. The **ModPod** includes mounting brackets/cable assembly for two RF radios, thermostat controlled cooling fan with optional heater, four 120 Volt AC outlets with power surge protection, 24 Volt power/175VA power supply with fused power distribution and pole mounting bracket.

## MODPOD FEATURES:

- Vandal and Storm Proof
- Seamless all welded construction
- Component can be replaced without removing the housing
- Key locking flush handle
- Seal tight hinged door with interior rain trough
- Steel shroud for air intake and exhaust
- 2"- 20" diameter pole bracket for easy field installation
- Radio mounting brackets (per manufacturer)
- Quad 110 Volt AC outlets with surge protection
- 24 Volt power/175VA power supply
- Output distribution board with reset-able fuses
- Temperature controlled fan/filter
- Power coating steel mounting plate
- Radio cable assemblies for lightning protector
- (2) N connector bulkhead knockouts
- (1) Electrical knockout with liquid tight connector

## MODPOD OPTIONS:

- Custom enclosure knockouts (front, side and bottom)
- Custom colors (Standard White)
- Custom decals (front and side panels)
- Ethernet switch for additional ports
- Stainless Steel Enclosure
- 24 Volt power/300VA power supply
- Custom electrical power supplies per country requirements
- Heater package
- 2.4, 4.9, 5.8 GHz Antenna Kits with antenna, lightning protector, coax cable assembly and Weatherproofing Tape

## ENCLOSURE SPECIFICATIONS:

Voltage . . . . .	110 VAC
Enclosure Material . . . . .	16 gauge steel
Enclosure Color . . . . .	Standard white powder coating
Weight . . . . .	36 lbs
Outside Dimensions . . . . .	17.0" x 16.0" x 9.0"
Complies with . . . . .	NEMA Type 3R
